SKILLS

- Basic Video editing
- Content optimization
- Project management
- Client engagement
- Android App Development (AI-Assisted using Android Studio)
- Built Android apps in Android Studio with AI support (basic level).
- Created full-stack web apps with AI tools (beginner level).
- Skilled in using ChatGPT, Claude, Gemini, and other AI tools for content creation.
- Arduino & Embedded Systems.

SUMMARY

Enthusiastic and adaptable **Software Engineering student** with hands-on experience in **AI-assisted development**. Skilled at building **full-stack web apps** and **Android applications** using AI tools such as **ChatGPT, Claude, and Gemini**. Experienced in **Arduino projects**, integrating hardware with software for automation. Strong ability to **leverage AI for coding, content creation, and productivity**, delivering quality results even with limited manual expertise. Passionate about learning, experimenting, and creating innovative solutions through technology.

EXPERIENCE

August 2024 - January 2025

VIDEO EDITING Freelance / Private Client | Lahore, Punjab

- Edited and produced **YouTube automation videos** in the **skincare niche** using **CapCut**.
- Managed the complete video creation process including trimming, transitions, captions, music, and visual effects to make the content engaging.
- Worked **remotely** with a client, ensuring timely delivery of high-quality videos aligned with the channel's branding and audience.
- Gained hands-on experience in **video editing, content optimization and collaboration**.

EDUCATION

January 2023 - January 2027

BS | BS SOFTWARE ENGINEERING

UNIVERSITY OF MANAGMENT AND TECHNOLOGY, LAHORE

January 2021 - January 2023

INTER | ICS PHYSICS

CONCORDIA COLLEGES LAHORE, LAHORE

January 2019 - January 2021

MATRICULATION

GOVT HIGH SCHOOL KARIM BLOCK LAHORE, LAHORE

PROJECTS

Clothing E-Commerce Website (Full-Stack, Ongoing)

- Developing a **full-stack clothing brand website** with AI-assisted tools.
- Designed a modern, responsive **frontend UI**; backend (Node.js/Express + MongoDB) in progress.
- Frontend is fully functional with product pages and interactive design elements.

Status Saver App (Android Studio, Kotlin)

- Built a simple **Android app** to save WhatsApp statuses (images & videos).
- Implemented using **Kotlin** in Android Studio with AI guidance.

Fusion X Gaming Store (E-Commerce, In Progress)

- Working on a **gaming e-commerce platform** for selling consoles and accessories (Xbox, PlayStation, etc.).
- Designing UI/UX and integrating backend with AI-assisted tools.

Bill Challan Generator (Flutter Web App)

- Created a **Flutter web app** to generate professional bill challans.
- Features include form input, PDF export, and responsive UI design.

Arduino & Embedded Systems Projects

- **Hand Gesture Car** – Controlled vehicle using gesture sensors.
- **Robot Fight Car** – Competitive robotic car for battles.
- **Bluetooth Car** – Wireless-controlled vehicle using Bluetooth modules.
- **RFID Door Lock System** – Secure access system using RFID technology.
- Plus multiple other projects involving **sensors, automation, and robotics**.
